

Come work for Climate University!

Climate University¹ is a nationwide interdisciplinary project, which organizes workshops and provides courses using online learning material on various aspects related to climate change and sustainability. The course offering of the Climate University is extended next summer by introducing the course “*Systemchange.now – systems thinking in managing climate change*”.

This course will consist of three parts. The first part provides an introduction to systems theory, systems thinking, mathematical modeling (of systems) and tools needed for example to simulate the behavior of dynamic systems.

We are looking for 1-2 employees to join our team in developing teaching material for this first part of the course. The positions are for fixed term of 4-8 months and can be either full-time or part-time, depending on the combination of hired people and their competences and interests. The applicants should be able to start working in early January 2020.

We will offer you

- a possibility to work on highly topical and important themes
- new knowledge and competences
- interdisciplinary cooperation with other Finnish universities
- flexible working hours and nice facilities at Aalto University campus

Good candidates for the position

- have skills in mathematical modeling and/or operations research OR in other fields related to systems thinking
- are interested in systems theory, systems thinking and related mathematical models and tools (such as dynamic system models and simulation)
- are either students or already hold a degree
- are capable of clear communication through writing and visual representations
- speak, read and write fluent English

Email your application to antti.punkka@aalto.fi. In the application, indicate your earliest possible starting date and whether you want to work full-time or part-time. Attach your CV and other documents you deem relevant (e.g., diplomas or transcript of studies).

The application deadline is 5.12.2019.
