[Probabilistic Seismic Hazard Analysis for Nuclear Power Plant Sites in Finland](#)

(2024-05-21) Vehmas, Juhana

Perustieteiden korkeakoulu | Master's thesis

Probabilistic seismic hazard analysis (PSHA) is a method used to estimate the likelihood of earthquake-induced ground motions at a particular location. These estimates are then used to evaluate the risk to a structure such as a nuclear power plant (NPP). The latest PSHA for a Finnish NPP site located

(2008) Eloranta, Antti
Faculty of Information and Natural Sciences | Master's thesis
- The popularity of exotic foreign exchange rate options has grown rapidly during the past decade. High profit margins and rapid market growth have made the market particularly lucrative for the banks. On the other hand, the correct pricing of exotic options requires more sophisticated models than the traditional Black-Scholes model. This thesis presents a new approach to pricing exotic options by combining the Black-Scholes model with the binomial option pricing model. The resulting model is able to handle both European and American options, as well as options with different payoff structures. The model is also able to handle options with different underlying assets, such as currencies, stocks, and bonds. The model is able to handle options with different underlying assets, such as currencies, stocks, and bonds. The model is able to handle options with different underlying assets, such as currencies, stocks, and bonds.

[Foresight in a Research and Technology Organisation](#)

(2006) Pirttimäki, Antti

Helsinki University of Technology | Diplomityö

Nopeutuvat tuotesyklit, monimutkaistuva ja monipuolistuva teknologinen kehitys ja tutkimus- ja kehitystoiminnan pitkät aikajänteet pakottavat tulevaisuuden kehityspolkujen ennakointiin oikeiden valintojen tekemiseksi. Teollisuudessa tuotekehitysprosessi hallitaan usein erittäin hyvin, kun puolestaan toimint:

[Calibration of an Optimisation Model for Short-term Hydropower Production Planning](#)

(2006) Kerola, Mikko

Helsinki University of Technology | Diplomityö

Sähkömarkkinoiden säännöstelyn purku on tuonut uusia haasteita kaikille sähköliiketoiminnan osapuolle. Nykyisessä tilanteessa sähköntuottaja kohtaa epävarman sähkön markkinahinnan.

Tuotannonsuunnittelusta on tullut hintalähtöistä, ja optimaalinen tuotannonsuunnittelu on
